Secure high-speed broadband

Stay connected to your tools at all times, quickly access your data and business applications, thanks to broadband Internet access

Fixed telephony over IP

Telephone lines accessible via softphone to remain reachable via the Internet on your computer or with dedicated devices

Secure WiFi & guest WiFi

Your employees and visitors can connect to WiFi with optimal security. A fully managed and secure next-generation network, offering a high-performance connection. You have full wireless coverage and easy access to connect multiple devices simultaneously and share your connection

Telephony with Microsoft Teams

Work smarter with Microsoft Teams, which brings together calling, instant messaging, meetings and collaboration

Service level agreement

Take advantage of an IT maintenance contract to help you better manage your project: 6h Time to Intervention (TTI) of 6h - 10h per day / 5 days per week (Business Hours)

Proximity Services

Entrust us with your IT management and focus on your growth. Our "Proximity Service" offers reliable IT support. You benefit from dedicated monthly on-site visits by an IT support expert, fast emergency response within 8 business hours, comprehensive coverage of your workstations, telephony, network, and cloud services, and professional IT advice to ensure the smooth operation and security of your systems. All of this comes without long-term commitments or unpredictable costs—just a simple monthly fee

Customized reports

You can get customized security reports and overviews of your Internet usage

Advanced security

A secure connection via a number of tools (IDS, IPS, Anti-virus, Anti-malware, Content Filter, DNS Protector), to protect your company's network against the most common cyber threats

Remote connection tool (VPN)

A VPN to create a secure connection to your local network

4G Back up

A 4G mobile back up to provide high-speed connectivity in the event of an Internet outage
